NOAA NCEI BATHYMETRY · 3 ARC-SECOND GRID · 1 METRE PLATES TO 25 M

The Floor of Lake Erie

Every metre of depth down to 25 m is drawn as its own plate, lit from the north-west, so the lake bed reads as a stack of cut sheets. Erie is a broad sunlit shelf: 89% of it lies in less than 25 metres of water. The dark eye is the exception.

Bathymetry and land elevation: NOAA National Centers for Environmental Information, Bathymetry of Lake Erie and Lake Saint Clair (1999), doi:10.7289/V5KS6PHK. Compiled from soundings collected since 1903 by NOAA, the US Army Corps of Engineers and the Canadian Hydrographic Service. Contours every metre to 25 m, widening with depth beyond it. Web Mercator. Rendered by ivansajdak.com.
